

E-Traceability Case Study on Starfruit of

Malaysia Food Information and
Traceability (M-FIT) Project

Presented by
Khairuddin Md Tahir

17 July, 2007

What is Traceability?

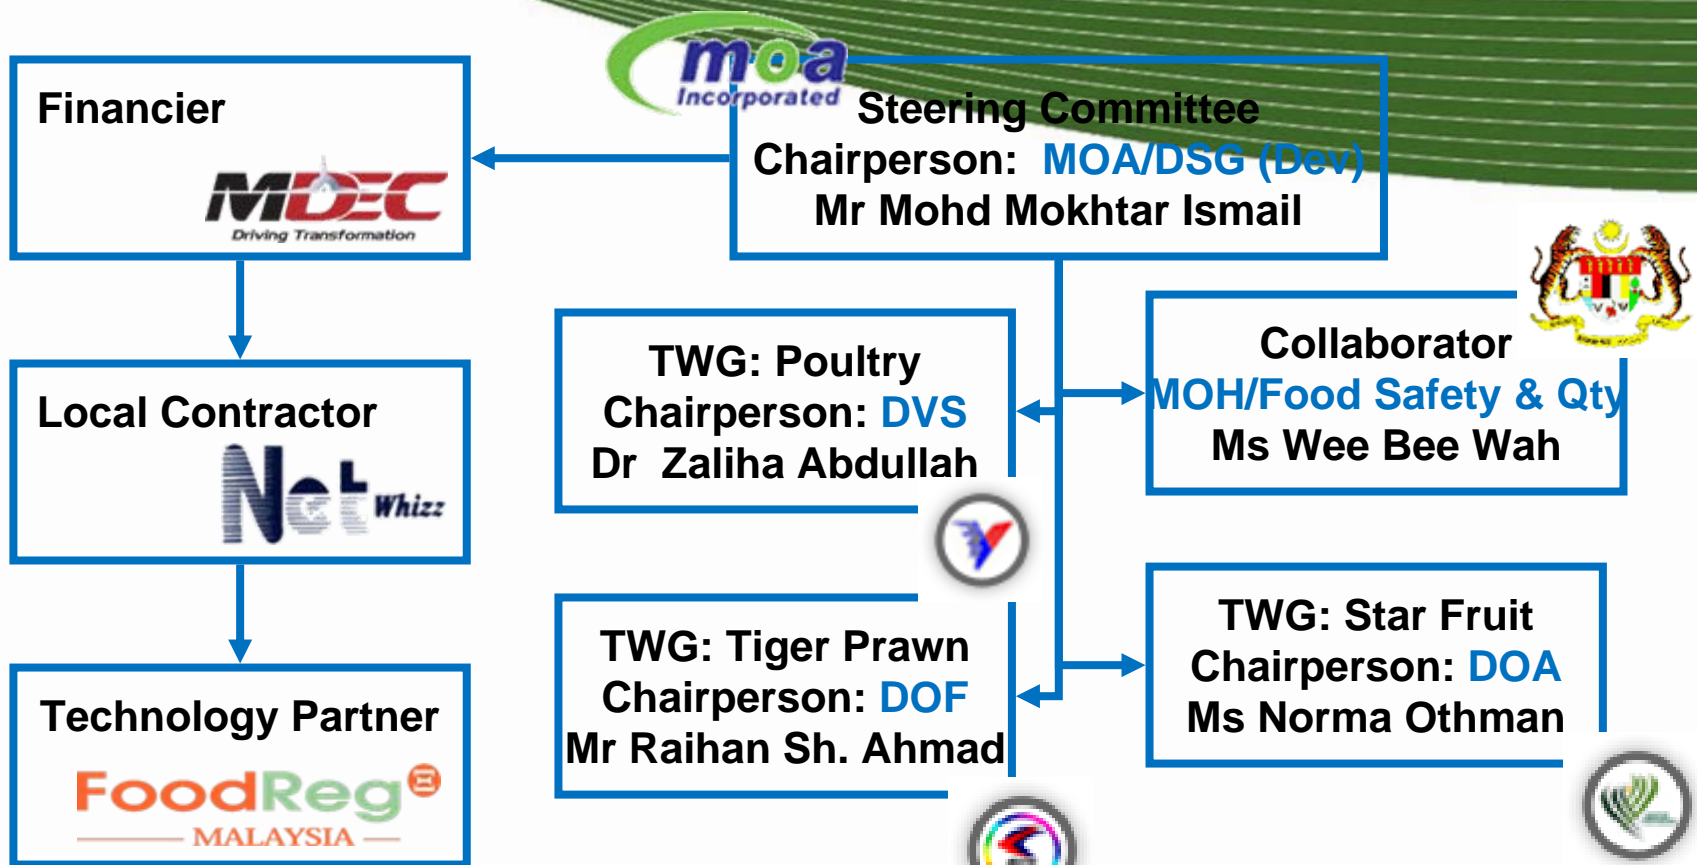

Definition

Traceability (EC/178/2002, implemented 1st Jan, 2005):

The **ability** to **trace and follow** food, feed and ingredients, through all stages of production, processing and distribution.

M-FIT Project - Background

M-FIT Project - Objective

Establishing Malaysia as a source of high-quality, safe food products and good environment stewardship

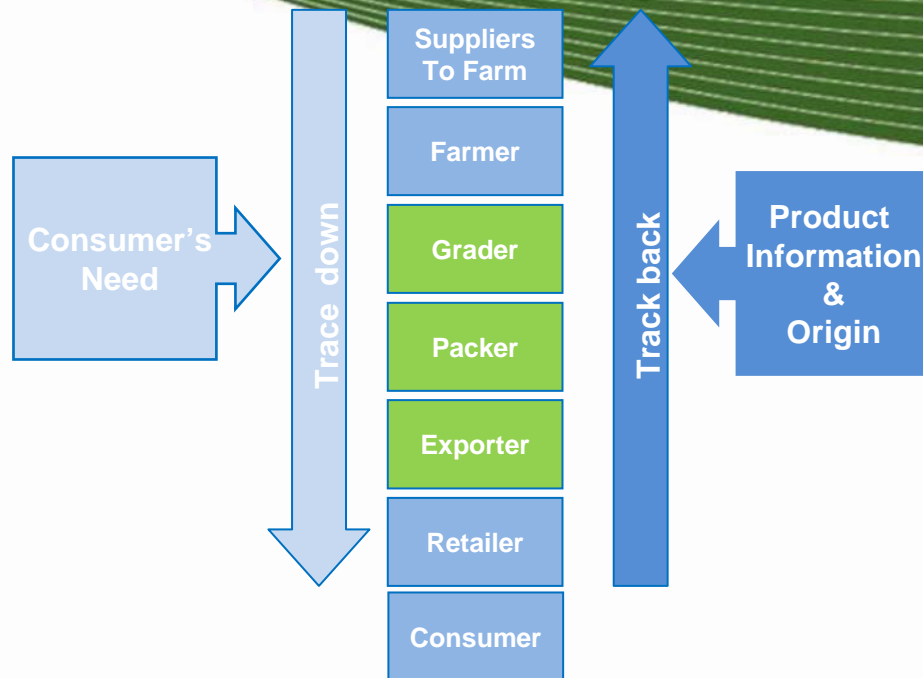

Establish a Malaysian 'Information Hub' serving the entire food chain which will lead to:

Better operational and information processes from farm to fork

Integrated data following international standards

M-FIT Project - Process

M-FIT - Project Timeline

22-Nov, 06

28-Feb, 07

30-May, 07

30-Aug, 07

30-Nov, 07

30-May, 08

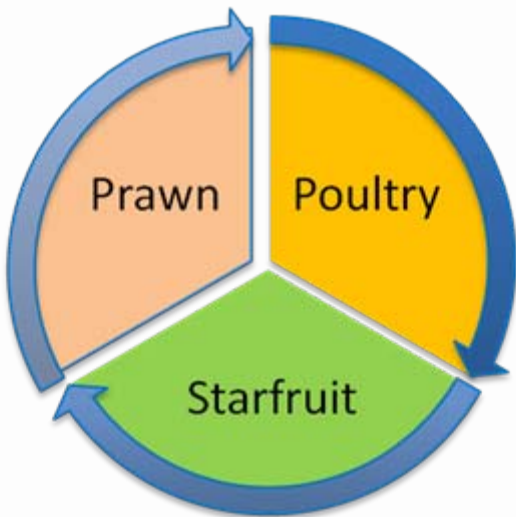

Phase 1
Need
Assessment &
Specification

Phase 2
System
Development

Phase 3
System
Deployment

Phase 4
Project
Hand-Over

Evaluation

System Implementation to 26 participants from each commodity

Benefits

- ❖ Continuous improvement on supply chain operation and productivity
- ❖ Boost export potential, market access & product differentiation
- ❖ Comply to national & international regulatory requirements of traceability & quality assurance system
- ❖ Meeting consumer's demand & expectation

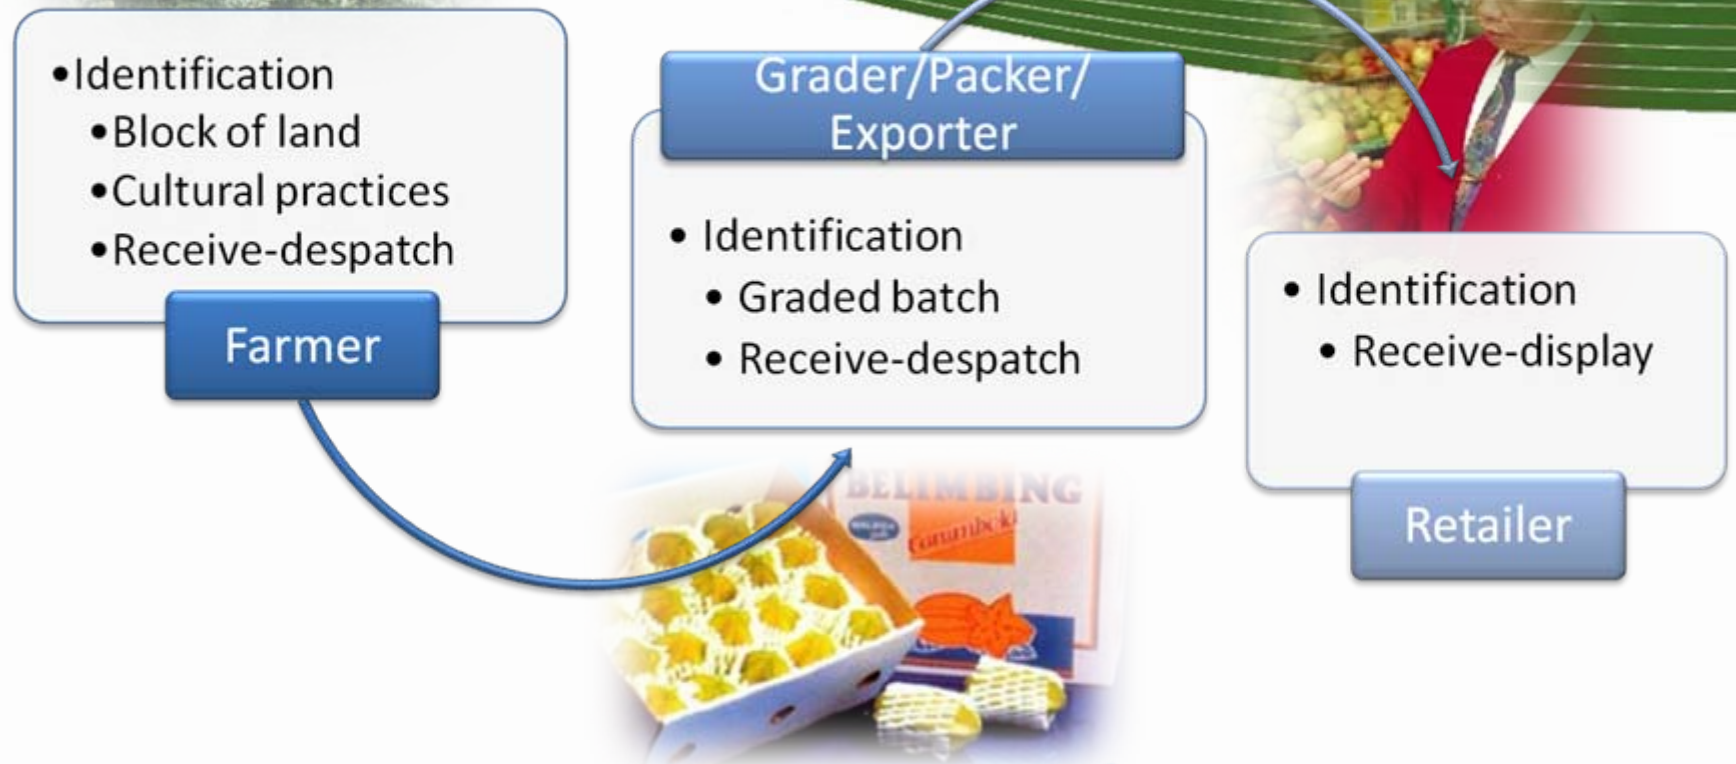

Current Issues

- ❖ Track back to farm origin
 - ❖ Inadequate farm records
 - ❖ Farm activities
 - ❖ Agricultural inputs
 - ❖ Manual system of recording
 - ❖ Missing information
 - ❖ Slow & tedious
 - ❖ Difficult to retrieve

Traceability System Indicators

M-FIT Initial Studies

Need Assessment - Participants

Farmer

Many small farms scatter around various locations in Malaysia

Sample: 14

Average 4 ha
(range 2 to 10 ha)

EurepGap & SALM
(5) & no certification
(9)

Grader/ Packer/ Exporter

Farmers sell their produce to 40 GPE (approx)

Sample: 7

Export: Canada, Netherland, France, Holland, Germany, UK

Local: Retailers

Retailer

GPEs sell produce to retailers

Sample: 2

Hypermarkets / Supermarkets

Challenges & Opportunities

- ❖ Most of activities performed at farm level
 - ❖ Food safety at farm level
 - ❖ Majority of small farmers not IT literate
- ❖ These small farmers work closely with GPE to perform related record keeping
- ❖ Meeting importer's requirement on traceability (bar coding system)

M-FIT System Deployment & Findings

Secured Access to M-FIT System

- Secured Access
- General Data
- Operation Data

Application of Pesticides Activities Per Fruiting Season

Block No: **BLK1**
 Start Of Season: 01 January 2007
 End Of Season: 15 February 2007

Supplier Delivery Id (DO): **RG6-TSTAR1-001D1A-6**

Farm ID	Product	Pesticide Name	PHI Duration	Event Date	Safe By	Harvested Date	Status
TSTAR1	Star fruit	Racun Kumbang	11	05.01.2007	16.01.2007	17.01.2007	
TSTAR1	Star fruit	Racun semut	20	10.01.2007	30.01.2007	17.01.2007	
TSTAR1	Star fruit	Racun semut	20	23.01.2007	12.02.2007	30.01.2007	

Warning: Unsafe. Produce harvested before PHI

Chemical

Pesticide hazard might occur in the produce ! Do not proceed to the next point of supply chain!

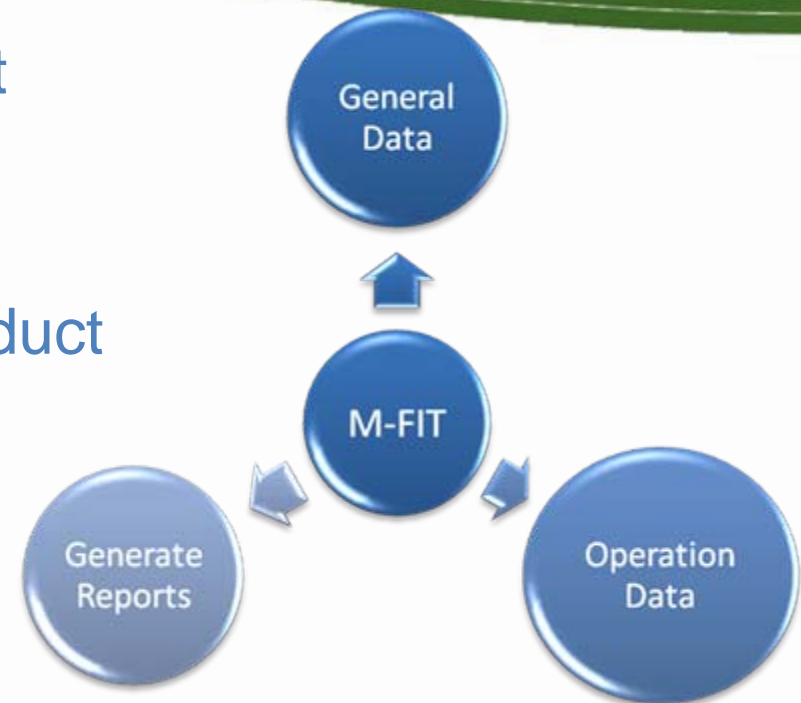

Dosage

Easy to Trace and Track

- ❖ Periodical reports generated
 - ❖ Better business management
 - ❖ Improve operations & monitoring efficiency
 - ❖ Alert or early warning or product recall

Conclusion

System Summary

- ID Code for Harvest
 - Block, Cultural Practices, GPE ID, Despatch

- ID Code for Grading & Packing
 - ID Code from Harvest, Farm ID, Graded Batch, Retailer ID, Despatch

- ID Code from GPE Grading
 - Track back to Farmer to Grader/Packer/Exporter (GPE)

System Summary

- ❖ What's next?
 - ❖ Evaluation of system
 - ❖ Further refinement of system

Project Summary

- ❖ System deployment for farms and GPE in progress
- ❖ System deployment for retailers will start end of July, 2007
- ❖ Full traceability from “farm to fork” is achievable

Project Summary

❖ What's next?

- ❖ Test system with other produce types
- ❖ Roll out nationwide for all commodity types
